## **Real Superheroes**

Compare and contrast the following two graphs. Graph 1

Median wealth of households headed by black individuals between the ages of 25 and 40 in successive waves of the triennial Survey of Consumer Finances, with and without student debt. \*Credit to Matt Bruenig for preparing these data from the SCF.

## Graph 2

Median wealth of households headed by white individuals between the ages of 25 and 40 in successive waves of the triennial Survey of Consumer Finances, with and without student debt. \*Credit to Matt Bruenig for preparing these data from the SCF.

## Answer the following questions.

- 1. What is the difference between median and average?
- 2. How do the median incomes of white and black households differ?
- 3. How does this impact each group's access to vital resources like healthy food, quality education, and stable housing?
